

The Night Sky Experience

S.S. BADGER

Welcome aboard! - The majestic S.S.BADGER has been crossing Lake Michigan for more than 60 years. Nearly half of those trips were evening crossings - often with spectacular sunsets for romantics and sparkling constellations for stargazers making the Badger experience even more special. We hope the sky over the big lake tonight provides you with a magical show creating memories you will treasure forever.

Together, we can show the world – literally, what a wonderful experience travel aboard the BADGER under the night provides. Please consider submitting your Badger night sky photos in a new contest we’re offering in 2017.

We’ll gather all of the photos submitted from the 2017 sailing season and select the perfect “night sky” photos from those submitted. The winning photographer will receive a gift package worth over \$500.00 in S.S. BADGER travel passes and merchandise. The winning photo will be a signature marketing image for the S.S. BADGER in future branding projects – and we will proudly offer photography credit to the winner – professional or novice. Please include an element of the S.S. BADGER in your photo. The photo could include a segment of the bow, a portion of the pilothouse or perhaps from the starboard or port side decks?

We’re so pleased that you’re traveling with us this evening and sincerely hope that the night sky is giving you a wonderful show!
